SUMMARY

Innovative Associate Software Engineer with robust experience in MERN stack development, contributing to cutting-edge enterprise CRM applications. Engineered CI/CD pipelines, optimizing deployment processes and reducing time-to-market for new features. Seeking to enhance application performance through skills in React.js, Node.js, and TypeScript, while contributing to a dynamic and forward-thinking development team.

EXPERIENCE

Associate Software engineering

Kiaq Technologies

April 2026 - Present, Chennai, Shollinganallur

• Associate Software Engineer (MERN Stack Developer)

- Developed and maintained enterprise-level CRM applications using the **MERN stack (React.js, Node.js, Express.js, MongoDB)**, delivering scalable and high-performance web solutions.
- Designed and developed **RESTful APIs** with Node.js and Express.js, integrating MongoDB databases for efficient data storage and retrieval.
- Built responsive, reusable, and component-based user interfaces using **React.js**, with state management implemented through **Redux Toolkit**.
- Implemented secure authentication and authorisation mechanisms using **JWT, role-based access control (RBAC), and protected API routes**.
- Optimised application performance through database query optimisation, API improvements, caching strategies, and efficient backend architecture.
- Integrated third-party services and contributed to **AI-powered features**, including chatbot functionality and workflow automation solutions.
- Collaborated with cross-functional teams in an **Agile Scrum environment**, participating in sprint planning, daily stand-ups, code reviews, and feature delivery.
- Managed source code using **Git and GitHub**, including version control, branching strategies, and pull request workflows.
- Performed debugging, testing, and issue resolution to enhance application stability, performance, and overall user experience.

Full Stack Developer

Yatra techs

July 2025 - January 2026, Coimbatore

- Completed **7 months of industry experience as a Full Stack Developer**, developing high-level full-stack applications using modern technologies and frameworks.
- Successfully delivered **7+ real-world projects**, including e-commerce platforms, business management systems, and dynamic web applications.
- Built responsive and interactive user interfaces with advanced animations using **GSAP**.
- Developed secure authentication systems, RESTful APIs, and scalable backend services using the **MERN stack**.
- Implemented **payment gateway integrations** and secure transaction workflows in web applications.
- Deployed and managed applications using cloud hosting platforms and production environments.
- Integrated **AI-powered features** to improve application functionality and user experience.
- Followed industry-standard development practices, including clean architecture, reusable components, and maintainable code.

Full Stack Developer

SJD GPS - (Mahindra tech chennai)

March, 2024 - July, 2024, Chennai

- After completing one internship, I received a stipend.
- During the internship, I developed a tracking project that involved frontend development and used MySQL for the backend.
- The internship lasted for 4 months.
- SJD gps Website testing
- Admin panel dashboard.

Full Stack Developer

Academor

August 2023 - November 2023, Bengaluru

- Completed a **3-month internship** during the 3rd year, contributing to the development of minor and major projects while gaining hands-on experience in real-world software development practices.
- Successfully handled assigned responsibilities, collaborated with team members, and delivered project tasks within defined timelines.
- Earned an internship certification for successful completion and performance during the training period.

PROJECT

Tajmahal static website

Weather forecast App

Movies management app

moviesmanagement.netlify.app/

- used mern stack.

Morning star mart

morningstarmart.com/

- Sri Lankan based projects.

BMV - north indian projects

bnvdecors.netlify.app/

- info home furnitures and hardwares.

Jehovah

jehovah-energy.netlify.app/

- Solar Based.

AI CHAT BOT

The Pushpa - Bot • July 2026 - Present

• Currently Working On – Pushpa AI Bot

- Currently developing an AI-powered chatbot inspired by the Pushpa Raj character using React.js, Node.js, Express.js, and Ollama (Llama 3). The project focuses on building a responsive chat interface, integrating a locally hosted large language model, developing REST APIs for real-time communication, and creating a scalable full-stack architecture with secure and efficient AI interactions.
- Optimized chatbot response times by implementing efficient prompt engineering techniques and fine-tuning the Llama 3 model for specific conversational contexts.

The Daily Ledger

News Journal • the-daily-ledger-site.netlify.app/ • June 2026 - July 2

- The Daily Ledger – A production-ready, fully responsive MERN Stack news journal application featuring JWT authentication, Google OAuth, OTP email verification, image uploads, Redux Toolkit, and secure deployment using Netlify and Render.
- Integrated Google OAuth and OTP email verification to streamline user authentication and enhance security.

EDUCATION

Engineering in Electronics and Communication Engineering

CIET • Coimbatore Narasipuram • 2025 • 7.74

Diploma in Mechanical Engineering

SRIPC • Athipalayam CBE • 2022 • 8.8

- Awarded First Place on Mechanical Department

CERTIFICATIONS

Certification for performance

Yatra Techs • 2026

- Developed and delivered multiple full-stack applications simultaneously, including e-commerce platforms, business websites, and custom web solutions using modern technologies.
- Built and deployed production-ready e-commerce applications with responsive user interfaces, backend APIs, database integration, and hosting configuration on **Hostinger**.
- Managed complete project lifecycles, including requirement analysis, development, testing, deployment, and maintenance.
- Integrated third-party services, payment workflows, and essential business functionalities to enhance application capabilities.
- Developed scalable MERN stack applications with secure authentication, API integration, and optimized database operations.
- Configured domain, hosting, and deployment processes to successfully launch client and business websites in live environments.

Full Stack Developer - (Mern)

Udemy • 2025

• MERN Stack Development Course – Udemy

- Completed a comprehensive **MERN Stack Development course** covering modern full-stack web development concepts and industry practices.
- Gained hands-on experience with **React.js, Node.js, Express.js, and MongoDB** for building scalable web applications.
- Learned advanced React concepts including **Hooks (useState, useEffect, useReducer), props, children props, lazy loading, component lifecycle, and state management techniques**.
- Developed CRUD applications with RESTful APIs, database integration, and backend development using Node.js and Express.js.
- Implemented secure authentication and authorization using **JWT, protected routes, and user session management**.
- Learned application deployment processes, including frontend and backend hosting configurations.

- Improved understanding of reusable components, performance optimization, debugging, and clean coding practices.

Node js Ai Development

Udemy • 2024

• Full Stack Development & AI Integration Learning – 2024

- Completed advanced learning in **Node.js backend development**, focusing on building scalable server-side applications using Express.js and RESTful APIs.
- Developed multiple backend projects, including **Income Tracker and Movie Management applications**, implementing CRUD operations, API development, and database integration.
- Gained hands-on experience in designing backend architectures, creating API endpoints, handling requests/responses, and managing application data efficiently.
- Learned secure authentication concepts including **JWT-based authentication, middleware implementation, and protected API routes**.
- Explored AI integration by working with **AI models and Gemini AI APIs**, understanding API-based AI functionality and chatbot development workflows.
- Learned application deployment concepts, including configuring hosting environments and connecting frontend applications with backend services.
- Improved practical knowledge of full-stack development, debugging, performance optimization, and building real-world applications.

Web developer Intern

Academor • 2023

- Completed a 3-month academic internship focused on full-stack web development and real-world application development.
- Developed multiple projects, including e-commerce platforms and business websites, using modern web technologies.
- Worked on frontend development, backend API creation, database integration, and application deployment.
- Deployed web applications using hosting platforms such as **Hostinger** and configured live environments.
- Gained hands-on experience in building responsive user interfaces, implementing application features, and managing complete project workflows.
- Successfully completed the internship and received certification for performance and project contributions.

SKILLS

React js

Node

JavaScript

TypeScript

MongoDB db

Mysql

deployment

Redux Toolkit

DSA

Ollama, Api, Jwt, Rest

FastApi, Github, Git
